Report Ültimatum Demands Surrender Tomorrow

Nazi Offer Is Denied By Truman

Quick denials by President Truman and Gen. Eisenhower put the damper on reports that Germany had surrendered unconditionally, but dispatches from the San Francisco Con-ference—quoting high officials—said yes-terday that acceptance was "expected hourly" of a reported Allied ultimatum calling on the Germans to surrender by

According to these reports, the United States, Great Britain and Russia had delivered the ultimatum to the German government controlled by Heinrich Himmler after a surrender offer to the U.S. and Britain had been rejected because Russia was not included. The alternative, reports said, would be the intensified destruction of Germany's physical assets.

"The German offer is generally accent-

"The German offer is generally acceptable to the American authorities, except that all the Allies must be included," Morgan Beatty, NBC commentator, said in a broadcast from Washington. The offer, Beatty said, was made in the middle of last week.

"There is no foundation for reports that Germany has surrendered uncondi-tionally. These rumors are unfounded," Mr. Truman told newspaper correspondents Saturday night after an Associated Press dispatch from San Francisco quoted a member of the U.S. delegation as saying that an announcement of Germany's unconditional surrender to the Allies "with-out any strings" was expected momen-

The spokesman later was identified as Sen Tom Connully (D.-Tex.), chairman of the Senate Foreign Relations Commitof the Scoate Foreign Relations Commit-tee and vice-chairman of the delegation. Connally's statement was supported by another member of the delegation, AP stated. The Texas Democrat later said he had authorized the statement and that

The Swedish Foreign Office yesterday confirmed reports that a surrender offer had been made and that Count Folke Bernadotte, vice-president of the Swedish Red Cross, had been the intermediary.

Gen. Eisenhower told The Stars and Stripes early Sunday morning he knew nothing of any surrender offer. He said he had heard the press reports but knew nothing of such negotiations. Mr. Truman said Gen. Eisenhower had been contacted before the President's denial was made.

Connally, AP reported, said the sur-render offer was made by Himmler with the explanation that Adolf Hitler was ill and might not live another 24 hours. Himmler also, according to reports, offered to hand over Hitler's body as a

token of good faith.

Many diplomats in San Francisco interpreted the report on Hitler's illness as meaning that Hitler was dead and that Himmler had killed him. Others explained that what Himmler meant was that Der Fuehrer was a very sick man and that the announcement of unconditional surrender would be such a shock it would cause

Berlin Tottering; NewPocket Forming In Czechoslovakia

Reports of imminent peace in Europe, spawned by Allied hope and German despair, flew throughout the world over the week-end, but bullets and shells continued flying on the Continent's various battle fronts as Allied and Russian armies continued to mop up enemy forces still showing fight in the shattered Third Reich.

Nazi Germany was in its last throes. Berlin, its heart, was being crushed beneath the weight of Soviet forces apparently eager to secure the Reich capital as a May Day prize for Marshal Stalin. Munich, cradle of the Nazi movement and capital of Bayaria, had been entered by American forces as the redoubt in southern Germany was squeezed from both north and south. American and British forces were lunging through northern Italy in stabs such as the campaign on that peninsula had never before witnessed.

While American and French troops pushed on to clear the Germans from the southern redoubt, one of the two huge pockets formed by the American-Russian link-up at Torgau, U.S. and British forces lunged eastward from their Elbe River positions west of Berlin in a move to liquidate the northern

The battle for Berlin appeared to be in its final stages last night as Russian troops, with three quarters of the city already in their hands, launched a powerful assault against the core of German resistance now compressed in the heart resistance now compressed in the heart of Hitler's capital.

Moscow reports said the Red Army was battling for a May Day victory as Marshals Zhukov and Konjev fought to drive a wedge through the Nazi garrison by linking-up in the central area of Unter den Linden.

"The Germans took it for a time, but now they are cracking in blazing Berlin," a United Press correspondent wrote from Moscow. "From all parts of the city come reports of mass surrender by the Nazis, of commanders taking drastic measures to prevent their troops deserting and, when that fails, shooting themselves."

Other dispatches said the streets were littered with Nazi party badges, emblems and uniforms, discarded by the Germans in an effort to hide their affiliation with the Nazis. A snowstorm of charred, blackened paper also was falling on the streets, reports said, as the Nazis burned all documents and state archives. Civilians were doing likewise—destroying everything that would connect them with Hitler and his regime.

The Psychoneurosis Fad

DISPATCH (below) from our New York bureau highlights a problem which is causing returning servicemen some bewilderment and is rapidly assuming ridiculous proportions in the

It is the "psychoneurosis" fad which is sweeping the country and which is based on the belief that EVERY returning veteran is maladjusted and in need of special handling.

Dr. Charles Burlingame, chief psychiatrist of the Institute of Living, is quoted as saying that there is too much talk about soldiers "changing" on the battlefield, that some wives dread the return of their husbands, and that the public and not the armed services needs to be readjusted.

We think it is about time soldiers in the field take cognizance of the situation and answer this whole maladjustment business with a loud and prolonged Bronx cheer.

The fad is based on the doctrine that everyone who has seen overseas service is coming home slightly off the bean and in need of special treatment before he will be safe in his own home.

Books are being published on the subject, newspapers are whooping it up, magazines are devoting good white space to the project and every screwball with thick lenses and a long haircut is setting up shop as an expert on the returning

Like all fads, it will pass, but this one could do real and serious damage. Honest psychiatry is an established profession. Its services are badly needed by the many fine men who are coming out of this war with mental illnesses, either from battle shock or from the rigors of a difficult life under unfamiliar surroundings.

There are too many real psychoneurotic casualties in our military hospitals for the subject to be taken lightly. These veterans will need and should demand the most considerate of scientific treatment.

Our complaint is against the public penchant for something different" which has caused many otherwise sensible people to leap on psychoneurosis as tantalizingly With delighted cries they look about for somebody to practise on, and the soldier with overseas stripes makes a happy target.

Our big concern is against the screwballs who are scaring our wives and sweethearts and coaching them on how to treat us when we get home.

Our wives and sweethearts treated us fine before we left, and we are perfectly willing when this beef is over to take up where we left off.

We will be happy to sit in front of our fireplace and let them fetch usold-fashioneds and fried chicken, but not, please God, with the look of a trapped and frightened doe, waiting for the blow to fall.

It Takes All Kinds of Experts To Make a World Conference

By William R. Spear

Stars and Stripes Staff Writer NEW YORK, Apr. 29-The machinery of the United Nations security conference at San Francisco is something like the machinery of an army with its G1, G2, G3 and G4.

Army sections of personnel, intelligence operations and supply do their work separately and when they are all put together, the Army rolls. The conference will have four commissions, each with a job to do, and when they are all put together the conference creates a league to prevent future wars-we hope

Each of the four commissions, to be set up this week, will be composed of certain delegates and will have a specific job to do. When a commission finally approves a plan specifically assigned to it, will submit the plan to the whole conference in "plenary session," which is diplomatic language for a full-dress

The four commissions are:

1—The Commission on General Provi-sions. It will draft general rules for the league, such as what its purpose should be, who can be a member, etc.

2—The Commission on the General Assembly. This will draft rules for the assembly, which is one branch of the proposed security league and would be its

3-The Commission on the Security Council. The Council is another part of the proposed security organization and will be the body to decide whether and how the League should use force against an aggressor

4-The Commission on Judicial Organization. This will try to figure out how

to set up a world court to settle disputes among nations in a legal way.

The delegates who will be members of these commissions cannot possibly be expert in all the details which are bound to arise so they have brought with them staffs of experts on banking, economics,

Each commission will have more than one problem to solve and will need expert help on each, so about a dozen commit-tees will be established to work under and for each commission. The delegates may work on the committees or may assign some of their experts to work on the committees; the committees probably will be composed mostly of experts.

When a committee has worked out the

problem assigned to it, it will turn it over to a commission. And when a commission has worked out all the problems on the subject assigned to it, it will turn them over to the full conference. And when the conference has worked out all the sub-jects on the "agenda," which is diplo-matic language for docket, then the con-ference work will be done.

In addition to these numerous com-

mittees working for the four commissions there are also other committees working for the conference itself. One of these is the Credentials Committee, which sees that only official delegates are admitted to the floor of the conference. Another is the Steering Committee, which makes rules and arrangements for running the conference. It was in this committee that Soviet Foreign Commissar Viacheslav Molotov on Friday upset the plan for Secretary of State Edward R. Stettinius

Jr. to be elected permanent chairman. In addition to its experts, the U.S. delegation has some 40 consultants and 80 associate consultants who have been given semi-official status by the State Department. This came about when all kinds of special-interest groups, such as veterans, farmers, labor, business, Jews, etc. sought to have a voice in the conetc., sought to have a voice in the con-ference and wanted to send delegations to

ference and wanted to send delegations to San Francisco.

To prevent chaos and overtaxing of railroads and hotels, the State Department gave recognition to 40 organizations—the National Grange, Kiwanis, International, the American Legion, etc.—and told them to appoint one member as a sociate and two others as associate. consultant and two others as associate consultants and it would see that they got to San Francisco, would be kept informed of the proceedings and would be consulted by the U.S. delegation.

It would take too long to list all these

organizations, but those representing veterans are the American Legion, the American Veterans Committee, the Disabled American Veterans of the World War and the Veterans of Foreign Wars of the U.S.

TheyKindaThink We'reKindaNuts

NEW YORK, Apr. 29-A great many people in the U.S. seem overly preoccupied with the GI's state of mind, particularly with the "problem" they think it is going to be for soldiers to "readjust" themselves to civilian life.

There seems to be ground for suspicion that this "problem" will not be so difficult after all and, in this connection, three items in the news are interesting.

One is a statement by Dr. Charles Burlingame in a board of directors' report of the Institute of Living, of which he is chief psychiatrist, that returning service-men are plagued by a widespread civilian belief that every ex-serviceman has a psychiatric problem.

He finds there is too much talk about soldiers "changing" on battlefields and that some wives dread the return of their husbands and exaggerate their nervous-ness when they do come home. His advice is to quit scrutinizing returned servicemen so closely.

The other item is a suggestion by Roth Miller, women's columnist for the New York World-Telegram, that the War Department make a movie for wives showing them why soldiers in the ETO must go to the Pacific. Noting that the War Department has made such a film for showing to troops in the ETO, she says letters she has received from trate wives indicate that the wives and each care that the wives are described to the control of the co indicate that the wives need such an ex-planation more than the husbands.

Still another item came from Dr. Edward A. Strecker, psychiatrist consultant to the Army and Navy Surgeons' General.

General.

Hitting at "Moms" who keep sons emotionally tied to their apron strings, Strecker said in a lecture at the New York University College of Medicine that "an alarmingly large number of young men in Army training and in Navy boot camps and at induction centers are not able to serve because of indefinite psychoneurotic symptoms. A considerable segment of the number is due to the fact that these rejectees have moms, instead that these rejectees have moms, instead of mothers."

Haegg Beaten At Penn Relays

PHILADELPHIA, Apr. 29—Gunder Haegg ran the fastest mile of his '45 American tour at the Penn Relays here yesterday, but handicaps proved too much and he finished fourth in the special mile run. His time was 4:12.7, almost two seconds faster than his best indoor effort, but West Point's James Howe, who had a 140-yard handicap, broke the tape 20 yard ahead of him.
