

Monschau Retaken by 1st Army

Butt Ration For All Sec At 5 Packs

Effective Sunday, the cigarette ration in Army exchanges for all personnel in the ETO will be five packs a week, Com Z Headquarters an-

a week, Com Z Headquarters an-nounced yesterday "in accordance with a directive issued by Headquarters European Theater of Operations." This makes the cigarette ration uniform throughout the ETO. It raises by three packs a week the two-pack-a-week ration of Com Z troops. It cuts by two packs a week the seven-pack-a-week ration of combat and replacement troops and hoscombat and replacement troops and hos-pital patients in the U.K.

No explanation accompanied an-nonneement of the new edict, which is the third major order affecting cigarette rations within the last month. On Nov 28 PX sales of cigarettes were

banned to all troops except combat and replacement troops and hospital patients. On Dec. 4 the ban was lifted in the U.K. and a five-pack-a-week ration was

U.K. and a hve-pack-a-week ration was allowed troops who had been receiving none. Com Z troops on the Continent were allowed two packs a week. No specific explanation ever has been offered either in London or Paris for the various orders affecting cigarette rations. The Federal Trade Commission and the Senare's War Investigating Committee both are investigating reasons behind a cigarette shortage in the States which has led to bootlegging and black-market con-ditions with which the Office of Price Administration is concerning itself.

U.S. Command 'Changes' Seen

Stars and Stripes U.S. Bareao NEW YORK, Dec. 20-Hanson W. Baldwin, New York Times military analyst, predicted today that some changes in the Army and Navy com-mand positions-both in Washington and overseas-would be forthcoming shortly. Hanson said that the five-star ranks approved by Congress recently "may be followed by promotions farther down the line and some shifts."

WASHINGTON, Dec. 20—The Senate War Investigating Committee charged yesterday that the War Department was "ruthlessly" stripping industry of "irre-placeable trained personnel" and then tailing "to use their manpower to best advantage after induction." The allegation came 24 hours after the Army had asked Selective Service to up the monthly draftee totals next January and February from 60,000 to 80,000.

Superforts Hit Tokyo Again

Saipan-based Superforts roamed over blacked-our Tokyo shortly before dawn yesterday. Many fires were started, re-turning crewmen reported. A Reuter Chungking dispatch said Monday's B29 raid on Hankow, in cen-tral China, had destroyed 42 Jap planes aloft and on the ground. It was dis-closed that Maj. Gen. Claire L. Chen-nault's 14th Air Force had struck at Hankow in co-ordination with the 20th down. down. Meanwhile, at Pearl Harbor, Adm. Chester Nimitz conferred with Adm. Sir Bruce Fraser, commander of the British Pacific Fleet. Fraser will co-operate with Nimitz or MacArthur as operations re-Hankow in co-ordination with the 20th Air Force Superforts, making a total raid proup of about 200 bombers and fighters. Chennault's planes hammered airfields north and south of the Yangtse River port while the B29s hit the city itself.

Warns Greeks **Of Big Assault**

ATHENS, Dec. 20 (UP)—Maj. Gen. Ronald M. Scobie, British commander in Greece, issued a flat warning today that from 9 AM tomorrow "every rebel gun firing in the city or suburbs will be imme-diately hit by all means in my power. The second will continue unit, the must are assault will continue until the guns are destroyed."

destroyed." Scobie's declaration came during some of the fiercest fighting of the undeclared Greek civil war. Meanwhile, King George of the Hellenes still had not replied late tonight to a telegram recommending the appoint-ment of Archbishop Damaskinos of Athens as regent. The proposal was supported here by Premier Georges Papandreou's government, the British authorities and liberal leaders not officially members of the Greek cabinet.

members of the Greek cabinet. It was announced today that RAF headquarters at Kafissia, ten miles north-west of Athens, fell to ELAS (resistance) forces yesterday.

Nazi Salient **Blunted by** Doughboys

Lt. Gen. Courtney H. Hodges' 1st Army troops, many of them sticking to their positions until overrun by German panzers, were reported last

German panzers, were reported last night to have blunted the enemy speathead near Stavelot, where the Nazis made a 20-mile drive into Belgium, and recaptured the German town of Monschau, starting point of this thrust, ene of four made along a 60-mile front along the Belgian-Luxemburg borders. Dispatches from SHAEF, where the news security ban was lifted enough to disclose developments on the 1st Army's long sector up to midday Monday, said tighting was under way around the three biggest road centers in eastern Belgium —at Stavelot, St. Vith, 11 miles south-east, and Malmedy, five miles northeast. Monschau, 16 miles southeast of Aachen, was retaken by the doughboys after they surrounded enemy units inside the town.

the town. Prior to the report of the blunting of the enemy drive near Stavelot, other dispatches said that some American forces had been pocketed in that region and at St. Vith when German armored columns carried out a pincers movement.

An Associated Press correspondent with the Yanks at Stavelot said the dough-boys, with anti-tank gun support, had

No Briefing by SHAEF; First Time 'No News'

SHAEF, Dec. 20 (Reuter)—In the middle of the biggest German counter-offensive since D-Day, the briefing of allied war correspondents at Supreme HQ was cancelled today because there was "no news."

It was the first time such a thing had happened since SHAEF began to function.

beaten off four strong German attacks yesterday inside the town itself. Meanwhile, the dispatch said, tanks and tank-destroyers struck at the flank of the German salient toward the town. Other enemy counter-attacks were repulsed at several points along this line, it was reported.

Correspondents and broadcasters ranged up and down the scale, some say-ing there were indications that the tide had turned for the Americans' favor and others asserting that the situation had not improved. On the basis of latest reports, it seemed that the front had been stabil-ized at some points, though it remained "fluid" at others. Weather still was with the Germans, restricting Allied air sorties because of a low ceiling. and Correspondents broadcasters

A United Press report from 9th Army HQ—where the flying-bomb raids were said to have assumed proportions reminiscent of London's summer blitz— spoke of a major penetration into the American lines west of the Luxemburg border at Consdorf, near Echternacht,

Simultaneously, Thunderbolts cut the Brenner Pass line at four points south of Trento.

Bad weather grounded Eighth Air Force aircraft Wednesday.

Vazi Blow Sits 'Em Up in U.S. By Carl Larsen

Stars and Stripes U.S. Bureau NEW YORK, Dec. 20-Germany's sudden shift to the offensive in Belgium and Luxemburg, mounting American casualties and the stepped-up draft brought the nation a grim reminder today that the war in Europe was far

from over. Newspapers used their boldest head-Ine type on the German thrust, while editorial writers drew parallels between the Nazi drive and the Germans' final offensive under Gen. Erich von Ludendorff in 1918.

Although there was no attempt to Although there was no attempt to dismiss the threat lightly, Washington officials were confident it would be checked. They speculated that the enemy push might call for revision of the Allied command's plans. Army spokesmen in the Capital ad-mitted the German counter-offensive struck the weakest part of the Western

Front. The sector was weak, they ex-plained, because of the wide dispersion of the Allied divisions and because the terrain was not considered important. These sources said the German offen-

sive could go a lot farther without causing serious damage.

Doesn't Expect Full Diversion

The spokesmen, describing the counter-thrust as probably as large an operation as the Germans were capable of making at this time, said they ex-pected Gen. Eisenhower to divert only as many troops as were necessary to halt it. They thought he would conhalt it. tinue to concentrate on pushing forward on other fronts.

"On the whole the chances are that Rundstedt has made the best possible choice in the use of his strategic reserve, considering that it was limited in size and that he has no hope of ultimate victory, but is fighting only to gain time,'

Maj. George Fielding Eliot, New York Herald Tribune military analyst, said. "If he is badly beaten in this attempt

he is hardly worse off than if he had waited for an Allied breakthrough and waited for an Allied breakthrough and then tried to defeat it in open warfare on the Cologne plain. It looks*very much like Rundstedt had concluded that the battle of attrition along the Roer was going against him, his front could not be held much longer and that his best hope lay in decisive action aided by surprise while he still had such means at hand," Eliot wrote.

such means at hand," Eliot wrote. Max Werner, military commentator for Field Publications, saw in the "re-vival of the German blitz method" an attempt "to break the offensive ability of the Allied armies—by shock and losses. Additionally, the German high command may possibly want to foster uncertainty, fear and even panic in liberated countries." Other analysts claimed the counter-

Other analysts claimed the counter-

drive was aimed at bolstering sagging morale on the Reich's home front by providing a "Christmas victory."

rmenairs

Out to Break Continuity

Drew Middleton, New York Times correspondent at Supreme Allied Head-quarters, said the factical objective probably was to break the Western Front's continuity, cutting communica-tions between the First and Third Armies and opening in the American line a bulge that probably would have to be smashed before large-scale move-ments elsewhere could be contemplated ments elsewhere could be contemplated. Dave Boone, whose homespun philo-

sophy is nationally syndicated, com-mented: "It takes something like that sudden re-entry of the Germans into Luxemburg and Belgium in a surprise attack against our boys to make the home front realize this war ain't a Hollywood script in which everything has got to go our way.'

Infantrymen's Badge

From the looks of the letters in B-Bag, there are lots of men in various outfits who seem to think they should have a \$10 raise in pay, plus a badge of some

sort. If the \$10 is what they want, tell them to contact any man from the infantry and

that man will personally give them his extra \$10, but if any of them want a badge for distinction they'd better join

Mauldin Cartoons

Dec. 11, 1944 To the B-Bag: Now that Wingert's cartoons of "Hubert" are to be published, how about the work of Bill Mauldin? 1, for one, would treasure a volume of his "real" cartoons, which have appeared in The Stars and Stripes. I did see a book of his GI drawings back in the U.S., which was really good. If any come out over here, I'll buy the first one.—Lt. M. M. Eayert, Infantry.

Furloughs for Fighters

Furloughs for Fighters To the B-Bag: Am I wrong, or isn't the Army over-looking a few thousand deserving men in its new plan to furlough combat men to the U.S.? Or was I mistaken when I read that a GI who had only been overseas since August, 1944, was one of those going home? What about the men who have been coming over here since early in 1942, and who have sweated out two or three cam-paigns?

paigns? What about the men who were wounded

so badly that they are no longer fit for combat duty and have been put on limited

assignments with service units here in the U.K.?

This is not a personal complaint, although I have been overseas 29 months.

I do think that rotating troops home from the front is a good idea, but let's see that all the deserving boys get an even

A Toast To Tomorrow YOMORROW is a long way

- An Editorial -

off. When it will come, no man knows. * *

But tomorrow is what we're fighting for. For the day when we set foot on the homeland, strip off the GIs and become Joe Citizen once again.

What tomorrow will be like depends on you, me and the other guy. On how we think and what we know and what we do. On how ready we are to pick up our share of the heavy post-war load. On the part we play in the life of America-and on America's role in the life of the world.

Today's Stars and Stripes carries the first issue of Tomorrow, a new weekly supplement. It covers the home front-as it is today, as it shapes up tomorrow. It shows

America at war-families and friends, factories and farmsforming the future even as they back the fight.

* It is presented in the belief that the sight of tomorrow will rivet our eyes even more closely on our peep sights today. On Berlin and Tokyo. On Hitler and Hirohito. On Fascists and Fascism. * *

For until they fall, tomorrow will never dawn.

No Spectators, but Some Show

B17 Goes Through Aerial Circus To Bomb Reich and Return A FORTRESS BASE, Dec. 20- | own oxygen connection loose and passed

Another drama of the air war over Germany was written when the B17 E-Rat-Icator came home to tell of the tailgunner who fell out of the plane and climbed back in, the ball-turret gunner who recovered after an 18-minute "oxygen blackout" and the waist-gunner who saved the life of a fellow crewman although he himself was wounded in the head.

All this happened while the battered Fortress, together with other Second Bombardment Group planes, was drop-ping its load on enemy marshalling yards at Ludwigshafen.

When flak puffed up from the target, the tail-gunner, S/Sgt. James L. Taylor, 22, of San Francisco, left his guns to put on his protective suit. By accident, part of the suit snagged the handle of the tail escape hatch, tripping it open. The slipstream caught the suit, pulling the gunner out of the plane, but the suit held to the handle.

Hauls Self Back In

Taylor managed to haul himself back in, but his oxygen hose had been pulled loose from its connection. He passed out. When Taylor failed to answer the interwhen Taylor failed to answer the infer-phone, the waist-gunner, S/Sgt. Cloyd B. Hicks, 21, of Union City, Pa., investi-gated. He found the gunner stretched out cold on the catwalk beside the open door. Hicks closed the door and revived Taylor Taylor.

Meanwhile, in the ball turret, S/Sgt. Jack M. White, 23, of San Francisco-a medic before he started flying-was giving Hicks instructions via the inter-phone. Simultaneously, he was manning his twin 50-cals.

In the excitement, White pulled his

and lorgot the incident. No one knew White had passed out. It was not until the Fort completed its bomb run and dropped to lower altitude that he revived, without aid. When the E-Rat-Icator landed at its home base medical officers expressed amazement that White showed no ill-effects from his 18 unconscious minutes.

Blinded by Flak, Navigator Sticks to Job

A FORTRESS BASE, Dec. 20—The fragments of a flak burst struck 2/Lt. Carl L. Hoag, B17 navigator in the face and eyes, rendering one eye useless and paralyzing the muscles of the other. Nevertheless, he plotted a direct four-hour course for the Fortress Mary Alice from Germany to England through dense cloud—holding open the somewhat-good cloud-holding open the somewhat-good eye with his finger-tip,

Almost unconscious from lack of oxygen, Hoag insisted on staying at his post. 2/Lt. Martin Karant, co-pilot from Chicago, repaired the navigator's oxygen system.

The pilot, 2/Lt. George K. Craft, of Helena, Ark., gave Hoag the air speeds and instrument readings while other crew-men furnished verbal map data. By mental calculations the wounded navigator abtenued a convert median and the flok obtained a correct reading and the flak-battered Fort, with two engines knocked out, made an emergency landing in England,

Hoag, who has recovered full vision in one eye and is recovering from wounds in the other, has been awarded the DSC, second highest U.S. decoration, for his "extraordinary heroism" of Nov. 30.

-B-Bagatelles-A Request to Santa, To Be Filed for '45 -Irvin S. Taubkin, Prop.-

IF we can push his mumble through these damned whiskers, we'd like to tell you about the Pic whose letter addressed to "Mr. Santa Claus, North Pole," was, for some unfathomable reason, delivered to us. "I've been told time and again," he writes, "there ain't no Santa Claus. But I know different. I don't want much this year. I can't have it anyhow. But next year, if you can is anyhow. But next year, if you can make this war end, I would be very happy." We don't have to tell you, of course, that the letter is signed "Pfc Section 8."

And while we're strictly minding our own business in this red-flannel monkey suit, a group of Mustang herders tackles us with another "Dear Santa Claus" plea. "We don't want no cigarettes they don't want." "We don't want no bourbon. We just want some Kraut

planes to knock down and some good weather to do it in. Our score—and we're only nine months old—is: 479 Nazi planes destroyed, 437 in the air; 122 locomotives junked; 519 railroad cars riddled; 24 staff cars perforated; and 600 Hun foot soldiers erased." * * * * Which brings us to Pvt. Bruce O. Underwood, who cuts through all the

Underwood, who cuts through all the Santa Olaus red ribbon stuff and goes

Manpower for U.S. Factories Dec. 6, 1944

To the B-Bag,

Regarding the manpower shortage in the U.S., we feel we have the solution. There are thousands of Limited Assign-ment men here in the ETO who would be more than willing to take a job in any defense plant at our present wage scale, and with the guarantee that there will be no walkouts or strikes for higher wages. Some of us have been in combat and others have been declared unfit for combat

duty, and most of us are doing very little now to further the war effort.

We do know what is needed at the front lines and we would bend every effort to further the flow of vital war goods. This is not a "bitch," it's just a suggestion to those who are concerned with the "manpower" shortage.—Six GIs of a Replacement Depot.

Traffic of the Future

NEW BRITISH FIREFLY is fast, very maneuverable. War-time advances will be reflected in tomorrow's family plane (below).

TOMORROW'S FAMILY PLANES, easy to fly, will cruise from 85 to 120 miles per hour, go 25 miles on a gallon of gasoline.

NAAU Proposes National Physical Fitness Program

TLANTIC CITY, Dec. 20 (ANS)-The National Amateur Athletic Union concluded its fifty-sixth annual convention by proposing a sevenpoint national physical fitness program and accepting 37 out of 49 proposed national records.

The physical fitness proposal, highlight of the convention, came as a result of the fact that many Americans have been found physically unfit for military

service. It coincided almost entirely with recommendations put before the meeting by Lt. Cmdr. Carl Olson and Cmdr. Frank Wickhorse of the Navy.

The percentage of American manbood classified 4F has been the subject of pre-vious discussion both by the Army and Navy

Accepted Recommendations

Accepted Recommendations A committee headed by Avery Brund-age accepted recommendations calling for (1) credit in school records for physical education, (2) annual physical examina-tions for all children, (3) arrangement for at least one hour each day for physical education in all schools, (4) making scholastic athletic programs available to everyone and not just those who like to take part. (5) making the program attractake part, (5) making the program attractive rather than compulsory, (6) athletics to be included in the school budget and not supported from gate receipts, (7) making facilities available for older citizens who wish to participate.

Turned Downed Records

The convention rejected nine proposed records because they already had been superseded, and turned down the 1,000-meter free-style mark by Ann Curtiss, San Francisco, because it was made San Francisco, because it was made against the clock. Another two were turned down for further study of timing. Delegates unanimously voted to make Buddy Young, Illinois senior, the 100-meter dash champion. His claim to the title was contested but finalists were disqualified for false starts.

Inventions 5,000,000 Copies Of Patents in '44

ASHINGTON, Dec. 20 (UP) - American industry,

search of ideas for post-war civilian goods, is checking over the 2,362,963 inventions patented since 1790, Grattan Kerans, administrative assistant to the commissioner of patents, reported.

In fiscal 1944, he said, the patent office, sold about 5,000,000 printed copies of patents. The demand in recent months has grown so heavy that the office, beset

Civil Pilots to Get Skyparks

IR parks first—planes second. That's what Civil Aeronautics Administration had in mind n it devised a billion-dollar when national airport program which, if carried out, will add 2,900 landing

carried out, will add 2,900 landing fields to America's post-war landscape. All prospective peace-time users of "flivver" planes should find the CAA plans more than slightly encouraging. Recently announced, the program re-flects a belief by the planning authorities that the airpark (small field for private planes) and the medium-sized landing spot for both private and airline use, will stimulate the sale of planes. The billion-dollar program calls for \$370,000,000 for medium-sized combina-tions of private and small city connercial

tions of private and small city commercial landing facilities. Altogether there would be 2,900 fields, counting both kinds. Besides this, the CAA intends to create about 100 more large commercial fields. Cost has not been approunced

Cost has not been announced.

Piper Says:

Piper Says: Landing recently at Norwood-Canton airport, near Boston, William Piper, maker of the Piper "Cub," stepped out of his own small plane and said: "Family travel of the future will be leap-frogging from airport to airport across the country, in privately-owned or rented planes. This family hedge-hopping will require tens of thousands of airports, not elaborate paved fields, but sod-covered runways of 1,800 to 2,000 feet. If the average man is to fly after the war some

Billion Dollar Program Will Give America 2,900 Airports

of the present restrictions on private pilot licenses must be relaxed It is not neces-sary to be a meteorologist or a navigator

sary to be a meteorologist or a navigator to get about the country in one of these little planes." Currently, the CAA is finishing a \$400,000,000 war program started three years ago. Which means that the U.S. has acquired 600 new or improved air-ports, almost all designed to be per-manently useful after the war in civil aviation.

If America is to have much of an avia-tion industry after the war, CAA believes, flying fields and landing strips must be within easy reach of the homes and offices of a majority of Americans. It is already on record with a forecast that by 1950 there will be about half-a-million light, personal planes used in the United States.

On Record

And already on record are applications of commercial airlines to begin air ser-vices to some 720 new points. Most of these will require new airport construction.

HANDY SKYPARKS may dot the nation from coast to coast, Built along highways, they will provide landing places.

aviation. If America is to have much of an avia-

Regular service is not planned for all these places, but where the demand becomes strong enough it will be provided. When the time comes to start the

billion-dollar post-war program, CAA will not ask for the whole amount in one chunk. Instead, it will ask Congress to appropriate about one million a year for ten years. Individual states will be expected to match the Federal expenditures

tures. Washington's half would go for government-built small airports, and other related expenses. Funds would be allocated to states along the lines of Federal-state highway programs. The formula for allocating the airport funds has been worked out so that it will equalize airport development throughout the nation. This means that weight will be given to the present number of air-ports in each state in relation to area, population and number of registered air-craft. craft

For example, Massachusetts, with its present 54 airports, would begin 36 new ones. Of these 18 would be airparks, 17 would be suitable for local airline opera-tions as well as private flying. One new field would be suitable for through airline operation. operation.

Smaller Type

In Minnesota, less highly-developed industrially and less concentrated in population, the post-war program would provide 159 fields. There are 45 in the state today. All but one of the proposed 114 new fields would be of the smaller type.

type. The CAA has requested the War Department to end the restriction on the marking of cities and fields. Every com-munity will then be identified by having the name painted in letters ten to 20 feet high on a roof. Sign "posts" some distance away will show the name of the place, arrow showing direction, airline mileage to nearest airport, an arrow pointing north, and longitude and latitude. Such a sign post is considered ideal. Enthusiastic as they are about post-war

Enthusiastic as they are about post-war aviation's prospects, even aviation men realize that the automobile is here to stay, regardless of how many "flivver" planes are wanted.

The automobile industry is planning for big post-war production. It's making war weapons now, and has been for a long time, but some day new cars will be coming off lines and Americans who have been wanting them will slip behind the wheels. That's another peace-time outloak outlook.

outlook. The development in the aviation in-dustry will not come overnight, Aladdin's lamp style. Something else seems pretty certain too. A great many service men, particularly those in the Air Forces, hope to get some kind of a job in civil aviation after the war. Some of them will, but, on the basis of what is known now about the situation, there are going to be a lot more job scekers in avition than aviation will have jobs to offer.

Ford Offers GIs Job Plan

"HE Ford Motor Company has proposed a plan to give veterans number one priority on all available work, if temporary or permanent lay-offs in the industrial empire become necessary.

Under plans submitted to the United Automobile Workers Union, Ford would also be permitted to hire honorably discharged veterans "at any time even when there are other employes of the company out of work." The "who comes ahead of who?" head-

Colleges Plan for Veterans

3,000 U.S. Plants Win 'E' Pennants

Ashington, Dec. 20-Since August, 1942, some 3,000 indus-trial plants in the United States have been honored with the E award for making outstanding records in the pro-duction of tools of war.

The Army-Navy E flag flutters over plants employing thousands of persons in single enterprises as well as over Red Cross blood banks manned entirely by volunteers. E awards are not common or easy to get. Record shows that only 3.55 per cent of the plants in war work are entitled to fly the red, white and blue E pennant from their flagstaffs.

The E award is given only on recommendations beginning on the field. The nomination travels slowly upwards through innumerable channels until it reaches the Army-Navy Board of Awards. After six months the award is reviewed.

The E pin is given to employes of plants to which the pennant is awarded.

"E" stands for Effort on the Home Front.

with printing difficulties, is running nearly two months behind in filling orders.

Patent requests had declined at the start of the war as industry turned to armament production but now are nearly at the flood stage as manufacturers scout for new or improved products, designs and manufacturing methods.

Industrial concerns, Kerans said, generally ask for copies of every patent issued relating to their particular field as well as for recently-issued patents on inventions. For example, he said one textile firm has requested copies of 8,000 patents.

The national association of manufac-The national association of manufac-turers has shown concern over the sharp decline in the number of patents issued during the war. Kerans felt, however, that there is no basis for alarm, asserting that the nation's "inventive genius" pro-bably is greater now than ever before. He added that while many of today's in-ventions may seem to be "useless gad-gets," they in time may prove to be major contributions to the world of the future. He cited the zinper as a "cadert"

He cited the zipper as a "gadget" example. A patent first was granted in 1893, but at that time it was considered useless.

Inventors who patent their devices are entitled to exclusive rights on them for 17 years.

ITH the return of more than 10,000 discharged soldiers to the colleges of the nations this fall, educators are giving much attention to the special needs of servicemen who will be coming home when the fighting is over.

A recent educational conference brought forth the Chicago University plan allowing veterans without any previous academic credits to enrol if

they can pass an intelligence test and dis-

Tomorrow-

"Tomorrow," newest of The Stars

And Unit News

and Stripes supplements, appears today for the first time. It will appear each

Thursday hereafter. Its purpose is explained in today's picture editorial on page 2. Unit News, a regular weekly feature, is contained on page IV of today's supplement.

Most colleges, however, favored the Yale plan, which calls for some high school or college credits. At Yale students can enrol at any time.

They are assigned a faculty adviser who helps with problems of adjustment and studies. Yale also provides specialized courses designed to fit veteran needs.

Other Plans

Other universities have variations of

of immediate jobs for veterans, offers re-fresher courses in certain key professions industries. and

Holy Cross allows enrolment at any time and offers four months refresher courses for which college credits are given.

University of Pennsylvania, profiting from soldier experiences at the University of Southern California, who found that soldiers considered fraternities and old-line academic subjects childish, have established a board to childish, have established a board to advise returning servicemen. Its purpose is to help soldiers and civilians get along, help veterans relearn study methods and

in general readjust themselves to civilian life

Oklahoma A and M cuts through department red tape and allows veterans to take any combination of courses they need.

Ohio State's policy is common sense. Reports and grades will be disregarded if it is felt that they are due to readjustment or emotional problems resulting from military service. Upon the soldier's request poor grades are erased from the record.

Temple University allows six credits for a special six-week refresher course in a variety of academic subjects. Students can enroll at any one of six specified periods. Headache number two for the educators

is money

With three million students, including soldiers, expected back to college within three years of war's end, schoolmen are wondering what to do about teachers, buildings, equipment and operating duffet deficits.

Federal grants have been asked for by

before Jan. 1, 1942. GIs inducted after Jan. 1, 1942, figure in the deal as of that date.

ache is taken care of by the proposal

This protection applies to veterans hired by Ford within a year of his discharge date or within 90 days after beating any physical disability resulting from army service—whichever period is longer.

The company also announced War Labor Board approval of \$80,000 worth of vacation and bonus money to the 2,500 of vacation and bonus money to the 2,300 honorably discharged veterans already re-employed at the plant. Ford estimates that, when all former employes have returned to work after the shooting, it will pay them about \$3,000,000 in vaca-tion and bonus money.

General Motors and Chrysler Corporations also have submitted proposals to the Union on preference rights for returning GIs.

The three corporations mentioned, as well as many others not having submitted definite plans, seem to be going much further in protecting jobs of homecoming veterans than called for in the provisions of the Selective Service Law of 1940.

Denver Students' Families

University of Denver plans to take care of the families of soldier students. Nurseries for kids are already in operation. Family dormitories are available. The soldier's wife will be able to study with him, if she desires, through special scholarships.

RADIO Nickel a Day Will Keep Advertisers Away

Crunchy-munchies are the stuff To make your junior big and tough! Tum-dee-dee-dum-dum and tra-la-la.

How often has some silly jingling rhyme sneaking out of a radio made you feel like committing hara-kiri? Or giving your long suffering ear drums a rest by tossing the radio set into the nearest ashcan?

Have you writhed in your easy chair while some svelte voiced announcer cooed: Have you flushed your thirtytwo feet of small intestines this morning with a sip of Pour-de-la-Drip, the safe, the easy, the pleasant laxative?

Or, maybe you get a slow burn at those soap operas that sting the air and the ears all day long. You know, Sadie McMurdock, Girl Blacksmith. Will Sadie marry handsome Harry Stoneheart? Will she sacrifice a life of luxury to stick with her mother? Tune in tomorrow at the same time for another thrilling episode in the life of Sadie, Girl Blacksmith. And, don't forget Vermicelli's famous soap-Sudsy Wudsies-makes all washing easier. Easy on the hands, too. Scientists say Sudsy-Wudsies are 99 and 99/100 per cent pure. The other 1/100 per cent is dirt from the grocer's hands. Buy a package now. Let your husband's steak burn, dash out to the grocer's before the economical, oversize packages disappear from his shelf.

Control your temper, buddy. Keep your blood pressure normal. Don't take

to rum, chum. There is hope for you, in the America being fashioned for the GI when he comes home to the U.S.A .-Tomorrow style.

It will cost you a nickel a day to keep from getting your dander up, your ire from going higher, at the sound of jingles, singing commercials, persuasive ads that stumble over each other in their eager-ness to pound at the eardrums of radio fans. fans.

The nickel-a-day proposition is some-thing novel. It's a new departure in radio broadcasting because for the price of a good cigar (?) you will get hours and hours of solid entertainment. From classical and accurate marked and the solution of the soluti classical and popular music to special features, mostly educational and public service messages, without plugs of any kmd.

This Utopia for radio listeners is ten-tatively called subscription radio. A bright fellow with his finger on the oub-lic pulse, whatever that is, has asked the powers that control radio in the United States to allocate three channels at the top of the frequency modulation bands for the project for the project.

The radio stations broadcasting the adless programs would jam their wave length with a squeal that is eliminated only by use of a patented gadget that the subscription radio company will rent to radio users for a nickel a day. No nickel-a-day gadget, no adless program. The rental of gadgets would be the only income for the sponsors of the adless radio programs. A spokesman for the project said it is not the purpose of the present breadering of the supplant the present

broadcasting system but to add something to radio.

MEDICINE **Medics Report**

ASHINGTON — Sixty thousand World War II American soldiers live today—though had they received the same type injury in the last war they would have died.

This was the dramatic account of the scientific advance of medicine and the care of the battle wounded which was reported by Maj. Gen. Norman T. Kirk, Surgeon General of the Army, to the annual meeting of the Association of Military Surgeons.

In addition, reported General Kirk, 9,000 men today have been restored to complete health although they received wounds that would have been per manently crippling in the last conflict.

12,000 a Week

Reported also at the session was the fact that 12,000 patients a week are now being discharged to duty from Army hos-pitals in continental United States. This is the equivalent to restoring 52 divisions a year.

Rapid first aid at the front and speedy evacuation to hospitals were credited with accounting for continually mounting per-centages of recovery. In the Navy, only 2.5 per cent of the casualties die. This compares to 8 per cent in the last war.

EMPORARY government housing built for the nation's war workers poses a peace-time problem for cities and towns in the United States,

Bone of contention between government housing authorities and real estate men lies in the 250,000 dwellings, 150,000 dormitory rooms, 40,000 trailers and portable units-totaling 440,000 units -which have been erected for the "duration of the emergency." The Lanham Act calls for their removal within two years after the end of the emergencyexceptions being made only when National Housing Act and community authorities agree. These exceptions must be reported to and reviewed annually by Congress.

The questions are, Business Week points out, how much can be salvaged from this big investment of taxpayers' money and how to do it without damage to real estate or construction interests.

Decided by Public Opinion

The temporary housing problems in the long run will be decided by community public opinion. Meanwhile, however, NHA's major policy is to see that public opinion considers long-time benefits rather than immediate exigency.

Of the 4,000,000 workers who moved conditions.

to war centers and were helped by war agencies to find lodgings, 2,200,000 were accommodated in existing dwellings. Private capital built housing for 1,000,000, while the remaining 800,000 were quartered in federally-built units totaling \$2,300,000,000.

NHA contends much of the temporary housing equipment and the material is of war-time quality and should be torn down to prevent development of federal-owned slums. On the other hand, permanent war housing will be released for peacetime use. The latter policy already is evident with the lifting of restrictions on occupancy and sales in some areas.

Sold for \$3,615,000

At Newport News, Va., for example, the 980-unit Stuart Gardens project was sold to a group of business and pro-fessional men for \$3,615,000. The project was a part of the Defense Homes Corporation program financed by Reconstruction Finance Corporation.

Real estate men, on the other hand, are interested in preserving pre-war rental values. One group of plumbing and heating men has proposed use of equipment salvaged from temporary dwellings in existing slum dwellings. Critics to this proposal, however, counter that a furnace and toilet do not eliminate slum

lowa 4-H boy and piglet.

by machinery and the efficient use of avail-

able workers. Farmers and their families worked more hours a day and more days a week. They lengthened the time of harvesting. They employed women and children, townspeople, war prisoners, foreign workers and others who normally are not a part of the farm labor force.

5,000,000 Placements

The Agricultural Department estimates 5,000,000 placements were made during the year through 12,000 local placement

the year through 12,000 local placement offices, set up under the U.S. Crop Corps recruiting drive in 3,000 counties. The Bureau of Agricultural Economics estimates that at the peak of the harvest season—in October—farm labor em-ployed totaled 11,839,000. This was 292,000 under the 1938-42 average. Importation of foreign labor to help solve the shortage was continued during

Inter-State Labor Pool

In addition, the WFA's Office of Labor transported 12,000 domestic farm workers from 19 states having tempor-ary farm labor surpluses to labor deficit states.

Farm labor supply camps were opera-ated by the WFA on 264 sites in 29 states to supplement housing supplied

states to supplement housing supplied by farmers and states. The government made medical and dental care available to the foreign workers, to the domestic workers trans-ported between states, to occupants of the farm labor supply camps and to farm workers in the areas served by the camps. In all, the department said, more than 132,500 received treatment up to October 1. up to October 1.

Troubles

In nearly every paper one picks up here is something in there about the GI Bill of Rights. Just what they are going to do with the GI Joe who prefers to be discharged after the war rather than stay in the Army? However, in no paper, or pamphlet, have I seen anything toward helping the GI Joe who prefers to stay in the Army after the war. I think the GI Bill of Rights should provide a means of security for the millions or so men who will have to be kept in the Army to maintain our national security so that the country won't be caught with its pants down again.

I've heard GIs themselves say: "If I could keep my rating and be provided with a family allowance, I'd just as soon stay in the Army.'

1 joined the Army in 1933, have a wife, a child and a home. My wife gets the dependency allowance plus the class "E" allotment I made to her. During all this time she has been paying for living expenses, made other payments, taken care of bills, etc., and has managed to put a little cash in the bank.

Now if I go back to the States and am discharged, I shall get the \$300 plus the other rights the GI Bill of Rights calls for. My wife's allowance stops, and I'm just another pre-war civilian looking for a job with only the experience of 13 years in the Army. With our little nest egg, saved up, fast dwindling away, and the years in the Army wasted, I'm just like a goose caught in a hailstorm, or 1 might say the "ugly duckling.

If I stay in the Army I stand a chance of reduction and my family allowance stopping. Then, with a payment to make on the home, with the cost of living where it is, I don't see how in the hell 1-or any other man-could make it.

I know there are a hundred thousand other regular Army men in the same boat. Here, in my own outfit, there are several regular Army men who feel and talk pretty much the same way as 1 do.-Sgt. Walter Nunn.

10,000 Bucks Worth

It is my belief that a great deal of theory could be eliminated on what to do with returning veterans of World War Il in connection with jobs, unemployment compensation, business and farming ventures, care of the partially disabled and the seeking of suitable employment for them. And also the expansive as well as expensive educational program which is contained in the GI Bill of Rights, and the need of establishing governmental agencies to see that everything runs smoothly.

My proposal in short is this: To give each serviceman, including all ranks with honorable discharges, and those who choose to remain in the service, an im-mediate bonus of \$10,000 to do with as he sees fit.

This would solve all the problems men-tioned above.-Cpl. C. A. Skarr, AAA.

A motor section wants America to wake up-A corporal sees 10,000 dollars in each vet's pocket -And a lieutenant wants to work

In Peace-Not Pieces!

Here, before me, I have some pictures of my wife and the children. All of them I love very dearly. I hope to be able to return to them and resume life and living as soon as possible. I hope, too, that I shall be able to resume normal business activity. I hope to feel that there will be no more wars, just as the rest of the GIs do.

The resources that are available all over the world and the supposedly good will of men should permit us-all of us-to live in peace. The post-war plans indicate that the Allied Nations are not in agreement but at variance in opinions concerning a lasting peace.

It is you and I that they are planning for. It is your responsibility and mine that they plan the way we would have them plan. It is your world and mine that they are revising. See to it that they do a good job. Use you right of "Freedom of Speech."

All of us-every unit, whether it he overseas or in their respective countries, whether they be ground forces, service forces, air forces, or any other unit-are sacrificing something toward the eventual victory. We shall not be completing the job, if and when we return we do not do our share to shape the world we want.

I know that I do not want my children in another war. There is no glory to he found in destruction. I do not want my children maimed or killed in conflict. I want them to live peacefully and creatively. I want them to understand what war really means, so that they will keep a constant vigilance against the possibility of any nation creating the tools of war. 1 want them to take the necessary precautionary measures to stamp out the initial stages of war and prevent any nation from depriving other nations of their way of life.

If all of us work together a creative life is possible. Let us learn to live in peace-not pieces!-Cpl. H. Erik Ferb.

Things to Come

Here is something that I have wanted to clear my racked brain of for a long time. I figure that now is a good time to do it.

It's a little matter of one year compulsory training service, after the war is over. I hope to hell that my son will over. I hope to hell that my son will never have to spend a year in the Army. Don't get me wrong, I'm not bitching. I just don't think it's fair. And I contend that it will ruin anyone who is not accustomed to it. Maybe your writers have some inside dope on this matter. But I tell you there are a million fathers

memorated by a new three-cent stamp, showing WACs and Gls viewing movies in a jungle clearing, * * * In ST. LOUIS the nation's biggest furned out for the Army Air Forces. These "Trojan Horses" have a wing span of 105 feet, carry a truck or a howitzer and 42 fully-armed men. Though the United States aviation in-dustry is doing some thinking in terms of peace-time "tomorrow" it is working in terms of war-time "today." A military transport larger than the

Look to Home

While looking through Life issue of Aug. 21, the gang came upon the article of poor, sympathetic U.S.A. taking in refugees of countries occupied by the Allied forces. Did they take in these same people during the last war?

Why in hell don't the folks back home look around and survey their neighbor's back yard first before going to the expense of taking foreign elements into the country we leave?

From experience we saw back in

Chance to Work

Since the Allied invasion of the Continent I have noticed the ever- ncreasing and undoubtedly sincere concern of our greybearded politicians and economic giants with the problem of post-war employment for our returning veterans. But I cannot help think that they are bypassing some very important considerations.

I wonder if they are not overlooking the fact that we have within our ranks today the same kind of men who pioneered America a few hundred years ago, found a Northwest passage, won a fight for independence, established a Union Pacific Railroad, developed the automobile industry, the telegraph, the airplane, the talking picture, the electric light and many other unheard-of and almost unbelievable things.

In the face of all this "power" our experts so far have been concerned chiefly with such petty considerations as finding us our "old job" back (which still leaves a man unemployed) or establishing some sort of government "gravy train" camouflaged with the name "pro-ject" (which would be a burden to tax-payers and an inefficient use of manpower and waste of raw materials).

The labor unions have some thought on the matter which, as near as I can determine, would correspond with "ift-ing" the country by its economic bootstraps and making extra jobs by some sort of black magic. (A union can con-trol, possibly, but how in hell can it create jobs? Through all this chatter I have failed to detect any plan as yet that looks like it might have the problem licked.

licked. If the salesman who has my job today is doing a better job than 1 can, then Um willing to look for another job. That is free competition, democracy, equal rights and everything else that 1 came over here to fight for. Nor do 1 expect or intend to go back and, walking under the banner of a veteran who has fought and bled, expect to find extra considera-tion and pily. As long as 1 can return with a sound mind and sound body 1'll be willing to trade on the same basis 1 did before the war. The cause 1'm fightdid before the war. The cause I'm fight-ing for is national, not personal. For the rest of the millions of servicemen I will say that, if private enterprise is not waiting with open arms to grab these men when they are discharged, a grave mis-take will be made. I only ask that the government provide us with a few basic principles, and I sincerely believe we can shift for ourselves.

First of all, we want an opportunity to compete for the jobs that exist now on an equal basis with the men who hold them. Second, the opportunity to borrow money for legitimate investment, with a fair chance to make a profit in proportion to the risk involved. Third, protection against monopolies, trusts and unfair competition which would tend to smother progress and retard industrial development.

In short, all we want is not primarily "our old jobs back" or a "free ride" on the government, but a damn good fair chance to "dig in" in a country still full of opportunity, still far from its poten-tialities, and keep America where it always has been way in front = 1/1 log S. has been-way in front.-1/Lt. Joe S. Matteson.

Reply to Hooton

I have just finished reading a statement in The Stars and Stripes by Dr. Ernest A. Hooton, of Harvard College, Cambridge, Mass., in which he suggested that the world should be policed by men over 45 years of age.

In the past I have always boasted about the intelligent professors that are attached to Harvard College, but after reading his article I have come to the conclusion that things must be pretty bad back home when an institution like Harvard will stoop so low as to have the likes of him on its faculty. The manpower situation must be pretty bad, that's all I can say.

A military transport larger than the combat Superfortress is undergoing tests. It would have a maximum capacity of 100 passengers or 35,000 pounds of cargo. Production of the jet-propelled Bell Airacomet is being continued, testing of another jet-propelled fighter developed by Lockheed is under way, and four other companies are doing research work on this

type of plane. In HARTFORT, Conn., plans of Air Force men to have a big part in post-war air transport in the States have been an-nounced. This came to light in the announcement of the formation of Norsemen Air Transport, and the group's application for a charter to operate a New England air line. The new company is made up of men

serving in various capacities in the Air Force and Air Transport Command. Some 330 men, ranging in rank from privates to lieutenants, have signed up as partners in the proposed concern.

The discovery that parts of sugar cane can be made into pulp parts of sugar cane many jobs for men around NASH-VILLE, Tenn., and other parts of the South, according to VANDERBILT UNIVERSITY'S Prof. E. E. Litken-house. . . Nine LOUISVILLE, Ky., banks are organizing huge sums of dough (\$21 090 000) for a not ware ordeit and (\$21,960,000) for a post-war credit pool to finance small and medium-sized businesses. . . Post-war clothing will be a far cry from Khaki. It will be light, warm and dirt-proof. Men's shirts won't need ironing after washing. . .

us when we get out of the Army? A guy's morale is pretty high when he is doing something which will help him in the future. Help him when he reaches the good old U.S.A. again.

I want to get this war over as soon as anyone else. Still, if I was doing

something that would help me build that home in the future, I could live a lot happier over here. A few months at something that was going to help bring in the bacon after the war wouldn't lower my morale a bit. It's going to be a big world, once we are out on our own again. Here is one workable instance. Doctors who have served on the front lines would enjoy a period of practice at a hospital before going back to their jobs in the States. No one will deny that they have earned this break.

GIs who figure on shop work or mechanics would like to get their hands greasy once again. Let's see what the GI thinks of these ideas. Maybe I have something here. My ideas don't always work.—Pvt, Dan Edwards, Ren. Med. Det

if he likes it, let him continue and carn himself a reserve commission. Not just me but many other fellows have agreed that this would be the proper way of

getting about this draft after the peace. That is one way that you could draw interest, also keep it from being strictly military. Don't let the Army handle it, but the nation's educators. They know military. Don't let the Arm, have know but the nation's educators. They know how, and right now in America we have some wonderful colleges which have the top ROTC available in the world. Yet they offer just a little more for one's money than war tactics. That is what we need.—*Cpl. Ellsworth K. Russell. Sig.* Corps.

Any Suggestion?

We are servicemen now overseas. We believe there should be an organiza-tion among the servicemen and women of this war, formed on a fraternal, non-partisan basis, for the purpose of con-tinuing the fellowship we have formed during it. We read of organizations of this type

starting in the States. Could you give us readers some information about them? What is the GI opinion on this idea? Personally we think there should be

that organization, not three or four, and that organization should be made of the young men and women of this war. Apyway we would like to get the ball

rolling.

Could you help us with a little information, and some expression of popular opinion on the subject? -T/5 Thomas J. Every, Pfc John L. Fraser. Louisiana and other areas, where we were on maneuvers, homes that weren't fit to house a dog. And children were running about barefoot. Why don't we take care of charity at home first instead of jump-ing too soon to help others?

We believe in loving our neighbors as we love others. But wake up, America. This mess isn't going to last for ever.— The Motor Section, F. A. Bn.

It Says Here

To me, the recent editorial "Are They Prepared for Tomorrow" is significant and proper.

It conveys facts that most of us don't realize are responsible for our having to leave home for the purpose of fighting for peace. Plenty of us fight-and some die- merely to get back home. Very few of us realize that to get back there for keeps we must be ready to join hands with other human beings on a basis of equality-without bigotry, racial hate and without senseless suspicion and fear.

We know damn well that we are underwe know damin went that we are under-going entirely too much, merely to think and dream of getting back to those soda fountains and juke boxes of yester-year. We should give a thought to the circumstances that caused us to leave them in the first place.

So, fellows, suppose we do a bit of horse-thinking so that our sons do not have to leave a happy home as we have, Okay?—Pvt. Sam Mims.

If he is all dried up, and his wife and family want nothing more to do with him, I suggest that he apply at his local draft board and get in uniform and come over here and police this world.

It's the likes of him who tend to lower the morale of the men who are doing their duty, and who are just waiting for the day when this mess will be over with so that they might return to their loved ones.

I'm happy in a way that he's connected with Dear old Harvard and that he is not in Washington, for if he were there he would probably try to put some crazy idea like this into effect. However, we do have men with common sense in Washington, thank God.

I am a native of his home town, not that I boast of coming from the same place as he does, and I'd like to nave him call on me when this mess is all over with so I can see just what kind of a dried-up guy he is.

Probably we can cut out paper dolls together, for I may be crazy by that time, too, after reading the ideas that his kind is always thinking up.-T/Sgt. Francis W., Breslin, - Bomb Group,

P.S.-He's welcome to my cigarettes if he wants to get away from his warm library and come over to get them.

Pilot Cheats Death, Brings Fort Home Wounded GI

Act Wins Flier MedalofHonor, 2nd in 305th

305TH BOMB GROUP, Dec. 20-1/Lt. Edward S. Michael, 25-year-old Douglas, Ariz., pilot whose skill saved his burning, shell-riddled Fortress and its crew from utter destruction during an assault on a Nazi industrial center Apr. 11, has been awarded the Medal of Honor for his action.

Michael, now recuperating in the U.S. from severe wounds received in the raid, got seven men out of the wildly spinning bomber, then pulled it out of its dive, deftly eluded pursuing Nazi fighters, and piloted it at tree-top level across France through ack-ack and small-arms fire.

More than an hour after crossing the enemy coast on a pre-invasion assault, the bomber formation was pounced upon by about 100 twin-engined Nazi fighters. Swarms of them came in from all angles and "ganged up" on the Bertie Lee, blasting Michael's ship with 20mm, shells until the bomber tumbled out of forma-tion and spun wildly earthward.

Jerries Chase Spinning Plane

A dozen Jerries followed the Fort down 3,000 feet. One shell exploded in the bomber's cockpit, wounding both pilot and co-pilot. Michael had been hit in the right thigh.

In a tremendous struggle with the balk ing controls, the pilot and co-pilot together pulled the plane out of its terrify-ing dive only to find the entire bomb bay, loaded with incendiary bombs, aftre.

loaded with incendiary bombs, aftic. As the flames licked dangerously close to the fuel tanks, Michael gave the bail out order. The top turnet gunner appeared in the cockpit, blood gushing from wounds in his head. He was holding his eye, shot out of its socket, in his hand. Disregarding his own wound, Michael turned over the controls to the co-pilot, and belowd the gunner to the nose escape and helped the gunner to the nose escape hatch.

Seven men had left the blazing bomber when the pilot found the bombardier wounded and alone in the nose, firing a gun at the enemy attackers. To save the bombardier's life Michael changed plans for abandoning ship. The co-pilot also chose to remain aboard.

Hides in Clouds

After 45 minutes the lurching Fort found refuge in a cloud bank and shook off the fighter planes. The bombardier had dumped out the burning bombs. Michael brought the Bertie Lee (his wife's name) down to tree-top level and zig-zagged across France, remaining at the controls until he passed out from loss of blood. blood.

blood. Reaching an RAF field on the English coast the co-pilot circled several times while the bombardier tried to revive the pilot. Michael finally regained con-sciousness and mustered enough strength to take over, completing a crash-landing without further mishap. Michael is the second member of the 305th to receive the Medal of Honor. Lt. William R. Lawley Jr., of Leeds, Ala., was decorated for his heroism during a mission to Leipzig, Germany, Feb. 20.

GI Christmas Cheer

Gis throughout the U.K. are playing Santa Claus as usual this year for thousands of kids who have had only a nodding acquaintance with toys, candy, ice cream and other luxuries of a normal childhood. Here Norah Colgan, of London, up to her neck in candy, cookies and gum, shows what the 361st Fighter Group has done. More than 800 children in H nearby villages will share in this batch of sweets, and 200 more, including two Stars and Stripes war orphans adopted by the 361st, will benefit from a Christmas party thrown at the station. A good selection of candy has been held out for 50 children in an orphanage, quaran-tined because of chicken pox.

-Air Force Notes -7 GI Palates Afire, Fightin'Hebe Meet a Rare **Completes Mission** Friend-Steak

Present at a dinner party Tuesday night

were a vivacious actress and a one-star general, but five GJs and two looeys-winners in the recent Eighth Air Force war bond lottery-had only one thought: STEAK!

It was a mouth-watering sight to hash-weary soldiers. Two inches thick, juicy, red inside, it lay there on the plate like a priceless Oriental ruby, garnished with

Forgotten temporarily was glamor and R.H.I.P. The boys sank their teeth into the tender meat with gusto, albeit with table manners befitting the private dining-room of an ultra-smart London inn. The dinned was complete to the drinks. But the boys sipped with restraint, drink-ing mean like agains servicity maidens on

fries and greens.

The Fortress Fightin' Hebe had been afire, the piloi's oxygen system had been shot away and four members of the crew had bailed out seconds before the bamber got over the target.

That was the situation 1/Lt. Gene H. Goodrick, pilot from Etterville, Mo., overcame on a recent mission over Ger-many. He released the bomb load on a Nazi synthetic-oil plant by operating an emergency-release, the fire extinguished itself, and with the assistance of the re-maining crew members Goodrick brought maining crew members Goodrick brought the flak-battered Fort back to base.

the flak-battered Fort back to base. It was two minutes before "bombs away" when an ack-ack shell struck the ship underneath the forward section. "It bounced me right out of my seat." the pilot related. "Then I bend a hissing noise behind me and smoke started fill-ing the cockpit." The bombardier, navigator, engineer and co-pilot parachuted out the escape hatch, apparently believing the plane was mortally hit. "When they opened the escape hatch, I think the draft of air put out the fire," Goodrick said. The four other crewmen who returned

Staged Game Of Leap Frog 600 Feet Up By Bob Krell Airborne Combat Correspon

507TH PARACHUTE INF. REGT., Dec. 20—When busy Cpl. Avery Rogers of San Francisco got tied up over Nor-mandy at 2 o'clock D-Day morning, a game of airborne leap frog developed in a C47.

a C47. Rogers and 16 other members of his unit were hooked up and ready to go as the plane neared the drop zone. Two successive flak bursts jarred the plane and

successive flak bursts jarred the plane and its occupants, causing Rogers' reserve pack to fly open and spill silk on the floor. He scooped it up and held it bundled against his waist. Over the drop zone, six men piled out but as Rogers shuffled down the aisle the bundled chute trickled free and caught on a piece of the seat. He jumped anyway, but the 450lb, tensile strength suspension lines refused to give an inch and he found himself suspended 600 feet over hostile territory. hostile territory.

The Game Starts Pfc Albert Abbott, of Clifton Heights, Pa., a leap frogger from the old school, set the example for men following by hurdling Rogers neatly. Five more men followed suit and Rogers seemed resigned to excitence as a pendulum

to existence as a pendulum. Here Pvt. Matthew Turk, of Bellerose, N.Y, deviated from the script. He threw a body block at Rogers. Then Pvt. Jack Biddle, of Walcottville, Ind., gave Rogers a Nagurski nudge that pried loose the helpless corporal.

a Nagurski nudge that pried loose the helpless corporal. Rogers' static line snapped taut and ripped off his pack cover. His main chute line blossomed and shortly after a bruised and battered paratrooper was on the prowl for the Wehrmacht.

Hold Week-Long Party For Kids at ASC Base

AN AIR SERVICE COMMAND DEPOT, Dec. 20-One thousand British DEPOT, Dec. 20—One thousand Britisn orphans, evacuees and school children are guests this week at a series of Christmas parties being given at this depot. The parties began Tuesday and will end parties began Tuesday and will end Saturday. Depot GIs contributed their candy

rations and part of their gifts from home so each child would have an individual package of delicacies to add to a dinner

that included fresh fruit and ice cream. Toys from the U.S. plus playthings made by the soldiers are distributed by a GI Santa Claus. Music by the post orchestra and a Mickey Mouse film fill out the entertainment end of the festi-vities.

Nails Sniper

Grit that carried Pvt. Johnny Accet-turo, of Seattle, Wash., to the Golden Gloves national finals as a lightweight kept him in there swinging after he had been wounded in Holland, and resulted in the elimination of a Nazi sniper who had been harassing medics and wounded men.

men. In helping chase Germans from a Dutch town, Johnny was wounded in the foot. While a medic was treating his wound at an aid station in an old barn a sniper hidden in the loft shot a buddy who had helped him to the station. Accetturo said this made him "plenty sore." When he heard the sniper scramble down the side of the barn a few minutes later he grabbed a rifle from beside his litter and dropped the Nazi as he took off through a field. The former boxer is recuperating at 187th General Hospital.

* * * * Thirty years in the Army, gassed and wounded by shrapnel in World War I, veteran of the Mexican Border cam-paign, M/Sgt. John (Deacon) Smith, 48, of Cooper, Tex., is recovering at 129th General Hospital from a shell fragment wound of the left leg received near the Siegfried Line. He holds the Legion of Merit, Purple Heart with cluster and French Croix de Guerre. * * * It was nearly 1 AM when Pfc Alexander Peters, of Boston, and a buddy heard footsteps approaching the haystack where they were on guard near Metz. They stiffened for a moment and then re-laxed with a chuckle. No footsteps there

They stiffened for a moment and then re-laxed with a chuckle. No footsteps there -hoofbeats, rather, from a herd of cows. When the cows stopped, though, and began retracing their steps quickly, the two became curious. They set out to in-vestigate, but before they could get far, all hell broke loose—rifle and tommy-gun fire and stampeding cattle. The bovine prowlers had run into a Nazi sneak pat-rol. rol

rol. Peters and pal routed the Germans. Later, during the advance on Metz, Peters was injured by a mortar shell, and wound up in 187th General Hospital. * * Pvt. Joseph J. Garcia, of Brooklyn, recuperating at 307th Station Hospital from a wound received at Nancy, fought with the International Brigade in the Spanish Civil War, where he was also wounded.

* * * Two brothers, Pvt. Earl E. and S/Sgt. Robert C. Wolfred, of Cokeville, Pa., wounded in different sectors of Europe, landed in adjoining wards of 101st General Hospital.

Short Bier for Adolf

493RD BOMB GROUP, Dec. 20.-Lt. John A. Lindquist, Ogden, Utah, bombar-dier, has the proper outlook for burying Nazi Germany under a bomb load. As a civilian, he was a funeral director.

'Team of Year'

Irish Five Steamrollers

SOUTH BEND, Ind., Dec. 20-Notre Dame's basketball record was

broken for the second time in three weeks last night as the Irish rolled over

Loras College of Dubuque, 91-44. The victory was a costly one for the Ramblers, however, as Guard Billy Hassett strained ligaments in his left knee early in the game and probably will be lost indefinitely. After playing on fairly even terms for the first half of the opening

Loras Quintet, 91-44

Once Over Lightly _____By Andy Rooney-

NEW YORK, Dec. 20-Already there is an unemployment problem. Postwar planning has completely neglected the returning professional baseball um-pire. Sgt. Art Passarella, the only American League caller-outer to serve in the armed forces, doffed his Army OD when discharged Monday, but when he reached for his old blue serge he found there was someone in it. Will Harridge, president of the

Icund there was someone in it. Will Harridge, president of the league, admits that Passarella's sudden return from his sergeant's post at Ft. Sheridan has created a dilemma. "We took on two new umpires—Jim Boyer from the American Association and Nick "Red" Jones of the Southern Association—when Art left two seasons ago," Harridge said. "Both did well, so now the league has 13 capable umpires and needs only 12." * * * BUFF Donelli, former Duquesne player who coached the Cleveland Rams this season, said in effect the other day that the Chicago Bears were not the kind of boys he wanted his little Rams.

kind of boys he wanted his little Rams to play with. "The Bears have always been on the everything goes side, but their rough-house tactics have stepped up since George Halas joined the Navy," said Donelli. And he was pointing a verbal finger at Bear Coach Hunk Anderson.

Donelli's complaint about the Bears' Pier Six tactics was the outcome of the Bear-Ram game in which five Cleve-land players were carried off the field, land players were carried off the field. Three of them were carted off in the first five minutes of play and three of the five were rushed to a Chicago hos-pital. He suggested that Commissioner Elmer Layden do something about the Bears' dirty play. The Chicago team's record bears out Donell's charge that they are strictly bar-room ball players. They broke their own National Foot-ball League record this year for number of penalties and yards assessed. * * *

SHORT SHOTS: An order for 58,000 baseball uniforms and two million baseballs has been placed by the Army and Navy for spring delivery to the armed forces. . . Gene Tunney has quit his attempts to hire the Baltimore Municipal Stadium for his pro football team and has bought part of the New York franchise in the All-America Football Conference just organizing. . . Army Fullback Felix Blanchard's father played football under Clark Shaughnessy at Tulane 25 years ago under the name of Belleau because the elder Blanchard's parents objected to his playing. . . Baseball club owners are scared about the new ruling making it tougher for the 26 to 37 age group to get deferments. . . There is a rumor that Andy Kerr may be leaving Colgate—and if that is true, Dud DeGroot, who is fed up after one year under Owner George SHORT SHOTS: An order for 58,000 up after one year under Owner George Preston Marshall, may move into Che-pango Valley to take over the Red Raider eleven.

Canadiens' Richard New King Of Ice Rink Punch Throwers

NEW YORK, Dec. 20-While the hockey season is still young, it appears that the heavyweight championsip of the National League has already been settled. Bob Dill of the Rangers, who entered the show last season with the announcement that he was the toughest guy in the business and aspired to the position left vacant by Eddie Shore's retirement, has met his master. Maurice Richard, quiet-spoken Montreal shot-maker, leads the league in

Bingham Raps Rule Changers

BOSTON, Dec. 20-Col. William J. Bingham, Harvard athletic director and chairman of the NCAA football rules committee now on military leave, broke a two-year silence yesterday and replied to critics and coaches who have defied his steadfast refusal to alter the football rules in order to loosen up college football. in order to loosen up college football. Bingham blamed the agitation for rule

Bingham blamed the agitation for rule changes on the fact that many college coaches are afraid of professional com-petition. He pointed out that professional players are physically better able to with-stand injuries which result from a wide open football while college players are mostly inexperienced and range in age from 17 to 21.

goals and also packs the best right-hand punch seen on a hockey rink in many a

day. Dill and Richard mixed it Sunday night

day. Dill and Richard mixed it Sunday night at the Garden and the fleet Frenchman came off with two decisions against the erstwhile bad man. They were thrown off the ice for fighting and once they got into the penalty box where the footing is firmer Richard uncorked his right and Dill's eye is still turning color. Phil Watson, who played for the Canadiens last year on lend-lease from the Rangers, filled in the details on Richards' athletic prowess. "You should have seen Maurice last summer at Bor-deaux, Quebec," Watson said. "From the 40-foot railroad bridge he would swan dive and jack-knife into the tiver. Richard would chase some of those bums who are making money as prize-fighters right out of Madison Square Garden in Watson's opinion. He kayoed Canadien Emile "Butch" Leonard twice with 16-ounce gloves last year—and Bouchard stands a mere six-two and weighs 220.

Sparked by Glenn Davis, the nation's top scorer, and Felix Blanchard, bone-crushing fullback. Felix Blanchard, bone-crushing fullback, Army rolled through a schedule with North Carolina, Brown, Pittsburgh, Coast Guard Academy, Duke, Villanova, Notre Dame, Pennsylvania and Navy for their first perfect season since 1916. The 59 and 62 points they scored on Notre Dame and Pennsylvania on suc-cessive Saturdays were the worst whack-ings those two schools ever got. Here are the first eight teams and total votes: Army 209; St. Louis Cardinals 104; Randolph Field 28; Ohio State 23; St. Louis Browns 21; Montreat Cana-diens 6; Green Bay Packers 4.

'Ox' Da Grosa Succeeds Scanlan at Holy Cross

WORCESTER, Mass., Dec. 20—John "Ox" Da Grosa, former Colgate All-American and assistant coach with Georgetown, Temple and the Philadelphia Eagles, was appointed head football coach at Holy Cross today to succeed Anthony "Ank" Scanlan, who resigned last night to devote his full time to his war plant business. war plant business.

Da Grosa, who played center, guard, tackle and fullback at Colgate, was an assistant to Scanlan this year and acted as the Crusaders' head coach many times while Scanlan was away at his business.

left provided the victory margin just before the midway mark. Then Eddie Buneteau came through with two un-

Buneteau came through with two un-assisted goals with less than two minutes remaining in the game. Goals by Herb Cain, Kenny Smith and Pat Egan gave the Bruins the lead they carried into the final period, and Don Grosso and Bill Quackenbush pushed home the other Wing tallies.

Hutson Does It Again-Says He Won't Retire

GREEN BAY, Wis., Dec. 20-Don Hutson's fourth annual retirement proved to be his shortest. The Green Bay end, who holds more records than any player in the 25-year history of the National Football League, announced his retirement Sunday, but said last night that he would return to the foot-ball wars "if the Packers need me." Hutson said that he hadn't "definitely wind but hat it is continued to the said that he

retired, but I will if conditions permit." In other words, conditions being what they are, good old Don will be back.

Dreaming of a White Christmas? Just Think of-Home and You Have It

A Bit of Charm

This is a little of the December weather at home. From left to right: Streets cars are stalled by a heavy Pittsburgh snowstorm and line up on Lincoln Ave. In Detroit, Joyce Witt brushes snow from the rear window of her car following the heaviest snowfall of the

season. In Washington, government workers wait frigidly and hopefully for transportation-Parked cars in Kansas City are blanketed by nine inches of snow. Winter weather isn't playing favorite sections, either. Snowstorms were reported from just about everywhere.

Life in Those United States **State Dept. Nominees OKd as Congress Quits**

WASHINGTON, Dec. 20-One of the most momentous sessions in Congressional annals closed last night when the 78th Congress adjourned sine die after the Senate had (1) approved six appointees for the State Department, (2) blocked a House-approved \$500,000,000 rivers and harbors

construction project and (3) blocked the House-OK bill

construction project and (3) blocked the House-OK bill which would have given postal workers a pay raise. Approval of the six State Department aides, headed by Joseph C. Grew as undersceretary, came after President Roose-velt had intervened personally in the dispute. Approved with Grew were William L. Clayton, Archibald MacLeish, Nelson Rockefeller, James C. Dunn and Brig, Gen. Julius Holmes. While the 78th Congress did not spend as much money as the record-breaking 77th, it appropriated approximately \$182,000,000,000 and raised the national debt limit to \$260,000,000,000. To meet about half the drain, Congress hiked income-tax rates to unprecedented heights and laid heavy excise taxes on many items. CAPITAL SIDESHOW: In answer to CIO President Philip

MACLEISH MACLEISH MACLEISH MACLEISH MACLEISH MACLEISH heavy excise taxes on many items. CAPITAL SIDESHOW: In answer to CIO President Philip Murray, who invited the AFL to co-operate in a joint drive for labor objectives, President William Green of the AFL declared: "It's the same sort of phony functional unity which the CIO has often prated about in the past." Green said the only way "to achieve unity" would be to unite organically, but "so far Mr. Murray has turned a deaf ear toward it." Farmers are doing their best to keep up with the cigarette shortage, the Agriculture Department reported in a survey which showed 1944 tobacco production hit 1.600,000,000 pounds—a new record. . . . The department also announced that indications were that the 1944 general farm output would set an all-time high for the eighth consecutive year. the eighth consecutive year.

The Judge Buys a Round

Battle Looms on Lupe's Will HOLLYWOOD, Dec. 20 (ANS)-A battle loomed today over the probating of a will left by Lupe Velez, who com-mitted suicide last week, when the screen star's sister, Mrs. Josefina Anderson, of San Antonio, Tex., said she had retained a lawyer to represent her and "my very poor family." One-third of Lupe's estate, valued at about \$175,000, was left to Mrs. Beulah Kinder, the late actress' secretary. Mrs. Anderson was not men-tioned in the will.

ATLANTA, Ga., Dec. 20 (ANS)—As his "Christmas present" to violators. Judge A. W. Gallaway announced today the fine for drunkenness would be only \$7, instead of the usual \$12 in the next few days.

Laird Cregar Left \$10,000

LOS ANGELES, Dec. 20 (ANS)-The late actor Laird Cregar, who rose from the penniless ranks to earning four figures weekly, left an estate reported at over \$10,000 to his mother and aunt, it was disclosed today.

4 GI Brides Find the 'Chaplain' Tied a Slip-Knot

ALLIANCE, Neb., Dec. 20 (ANS)-Four local girls who thought they married paratroopers here last August have discovered that their nupfials were faked by a soldier impersonating an Army chaplain, County Judge Penrose Romig said

today. The "ceremonies" were conducted in a barracks of an AAF base here which the girls were told was an Army chapel. The soldiers involved have since gone overseas

They discovered the true state of affairs, Romig said, when they found there were no marriage certificates recorded in the County Court, after they had applied for government allotment checks.

WASPs Disband

WASHINGTON, Dec. 20 (Reuter)-The WASPs-Women's Air Force Service pilots who have flown more than

4 Stars for Somervell?

NEW YORK, Dec. 20 (ANS)—Col-umnist Danton Walker, writing in the New York Daily News, predicted today that Li. Gen. Brehon B. Somer-vell, head of the Army Service Forces, shortly would be promoted it. to full general. He also reported that President Roosevelt was "willing" to accept Frances Per-kins' resignation as Secretary of Labor and that actor Larry SUMERVELL Adler's article in the

Isn't she luscious, lovely, delectable, delicious —? Well, anyhow. She's movie actress Evelyn Keyes, and we'd like to find her on our Christmas tree, 100.

Heroes - - -(Continued from page 1)

I got away again with two wounded boys and, by keeping to the woods, was able to bring them over to the American lines That's all, I guess."

An American field hospital was over-run by Nazi tanks and parachutists and the parachutists started loading nurses

and wounded on trucks to be taken to Germany when Lt. Col. Charles Horner, of Doylestown, Pa., dashed into town in a jeep followed by two half-tracks, started shooting from the hip and recap-ured the base tured the base. Doughboys took over the town just in time to shoot up two jeep-loads of Ger-mans who raced into town in captured American cars thinking their forces held Tanks appeared next and Yankees and tank destroyers slugged it out with the Nazis, who were on the receiving end for the first time in four days. The town now is firmly held.

No Formal Atlantic Charter Meet Miss Keyes -Who Here Unlocks **Ever Was Signed, FDR Says**

WASHINGTON, Dec. 20-There never was an Atlantic Charter, and WASHINGTON, Dec. 20-There never was an Atlantic Charter, and neither President Roosevelt nor Prime Minister Churchill affixed his signa-ture to the principles expounded at their first historic visit aboard the U.S. cruiser Augusta in the North Atlantic. The President startled his press conference with this information yesterday, thereby ending a minor controversy over why the Charter was not in the U.S. National Museum. According to Mr. Roosevelt, he and

which was the focal point of the southernmost of the four German thrusts.

Reuter's correspondent with the 1st Army said Hodges' men were not in retreat. Where breakthroughs have been made, he said, the Germans went over the Americans, who did not fall back.

The Americans, who did not fall back. Reuter quoted a First Army staff ollicer: "There is no question that, if properly handled, the war can be won right here. It is a very bold and well-run offensive. Evidently Rundstedt has borrowed divisions from elsewhere on the Western Front and, consequently, they have achieved breaks in our front line, But no great hole has been opened and But no great hole has been opened and our front-line troops have been still hold-

our front-line troops have been still hold-ing out, although some are badly hit." The battle was described as one of the bitterest of the entire Western Front. And the Germans were using all their tricks. There were reports that Germans troops, dre sed as civilians, had been dropped at key points. Other Germans, speaking English, were said to have operated captured American Sherman tanks, painted with the Allied star, as a decoy to trap unwary troops. Reuter reports from the First Army said that large numbers of Americans were fighting in small units in towns along the German-Belgian border and in the Mon-chau forest, where some of them

along the German-Beigian border and the the Monichau forest, where some of them were said to have been cut off. Supplies were fairly adequate except for food, said Reuter. Though air aid was impeded by thick fog, columns of trucks were clogging the roads behind the lines on their way to the front. There were no major changes along the

There were no major changes along the 3rd Army or 7th Army fronts. The 7th was meeting fierce resistance along a 20-mile sector before the Siegfried Line.

Chaplin Was

There, But—

LOS ANGELES, Dec. 20 (ANS)-Charlie Chaplin, on trial here today, de-

Tire Advice "The hiss of a puncture is music for German ears," began a letter-received yesterday by Tires for Victory contest officials-written by Sgt. David Couper, of a sub-depot.

Letters Offer

According to Mr. Roosevelt, he and Churchill scribbled their ideas on scraps of paper. Their efforts were typed, but neither statesman signed the draft, as they

had no authority to do so. However, the Fresident said, the eight principles of the Atlantic Charter were affirmed in the United Nations Declara-tion of Jan. 1, 1942.

WASHINGTON, Dec. 20 (Reuter)— President Roosevelt, in a Christmas message to U.S. war veterans, said today, "The way ahead of us is still arduous, and continuance of our utmost effort, together with that of our Allies, is indis-pensable until victory is won and a stable peace is established."

Arduous Path Ahead,

FDR Tells Veterans

"Compressed air is important for more than vibrating the vocal cords of politicians," said Cooper. "We roll to victory on it."

victory on it." The point-watch air pressure-was well taken, said contest officials. T/Sgt. Gordon G. Misener, of another sub-depot, pointed out that good-many times new-dual wheels were being used at some places to haul "human freight" to and from mess halls and the line. "Why new tires and why duals?" asked Misener.

Tire Blews

75,000,000 miles the last two years-were demobilized today. WASP director Jacqueline Cochran said: "The WASPs are being demobilized because the pilot shortage which existed in 1942 and which caused the women's pilot program to be started has now been effectively cor-rected."

The Cold Arms of Morpheus SOUTH BEND, Ind., Dec. 20 (ANS)— Snow covered the city and it was 27 degrees but Virginia Lewis and her boy friend, both 17, spent the night in the park. The boy, unidentified, fell asleep, Virginia said. He awoke with frozen feet in a hospital. It won't be necessary to amputate, the medics said.

February issue of a national magazine on entertainers antagonizing overseas soldiers would cause a minor sensation.

Governor Asked to Referee Battle of the Sex

BATON ROUGE, La., Dec. 20-The tempestuous case of the comely Lou-isiana State University co-ed who was expelled for writing a leaflet on kissing and sex seemed headed today for review by Gov. James H. Davis. Several hundred students marched on the Governor's mansion last night, demanding reinstatement of 18-year-old Gloria Heanne Heller, of Havana. Although there were shouts of "Strike!" among the collegiates, student leaders urged against this move "in view of adverse publicity already given our univer-sity."

Club Ousts Mischa Auer HOLLYWOOD, Dec. 20 (ANS)-Re-moved from the vice-presidency of the Russian-American Club here for allegedly "sowing the seeds of hatred and mistrust for our ally Russia," actor Mischa Auer said he had been merely protesting against Communism in the U.S.

Gone but Not Forgotten TRENTON, N.J., Dec. 20 (ANS)-ivil Service Commissioner William S. Civil Carpenter suggested today that leaves of absence from the police department be shorter. He pointed out that two Jersey City cops had been on leave to the County Investigation Bureau for ten years.

Wants U.S. Papers To Print in Rome, Paris

BARJ, Italy, Dec. 20 (AP)-Members of the House Military Affairs Committee were bound for home tonight after Rep. J. Parnell Thomas (R.-N.J.) said he planned to suggest that American papers increased plannes issue editions in Paris and Rome

clared that he had broken off all relations with his protege, Joan Barry, "somewhere back in February, 1942," and that there-fore he could not be the father of Miss Barry's child. Miss Barry's attorney, 77-year-old Joseph Scott, told a jury of seven women and five men that the child, Carol Ann, was conceived in Chaplin's bedroom the night of Dec. 23, 1942.

The greying comedian freely admitted Miss Barry had been in his bedroom that evening—but with a gun threatening to kill herself. Chaplin testified he talked her out ofit

New Nazi Chief in Norway

STOCKHOLM, Dec. 20 (AP)-The Norwegian legation here reported today that Gen. Rendulic had been named German commander-in-chief of Norway, succeeding Gen. Von Falkenhorst, who has been in command for more than five years

Hell of a place to get a flat, "Some-where in Germany," amid a setting of debris and devastation, Pfc Sal Marino, of San Gabriel, Calif., hurries the repair of big leader the department of the set of his jeep's tire. A critical tire short-age has hit front-line troops slugging it out with the Jerries. U.K.-based soldiers can help their buddies in the foxholes by doing all they can to conserve tires.
